

PERFORMANCE TESTING REPORT:

1. Objective

To evaluate the performance of the website **ticketwala.pk** under load conditions using Apache JMeter by testing login and dashboard functionality.

2. Test Environment

- Tool: Apache JMeter
- Website: <https://ticketwala.pk>
- Test Type: Load Testing
- Browser: Chrome (for reference)
- OS: Chrome OS (Chromebook)
- Internet: Stable connection

3. Test Scenario

- Functional Areas Tested:
 - Login Page
 - Dashboard Page
 - Overall Website Load
- Number of Virtual Users: 50–100 (Load simulated as per test run)
- Test Execution Tool: Apache JMeter

4. Summary of Results

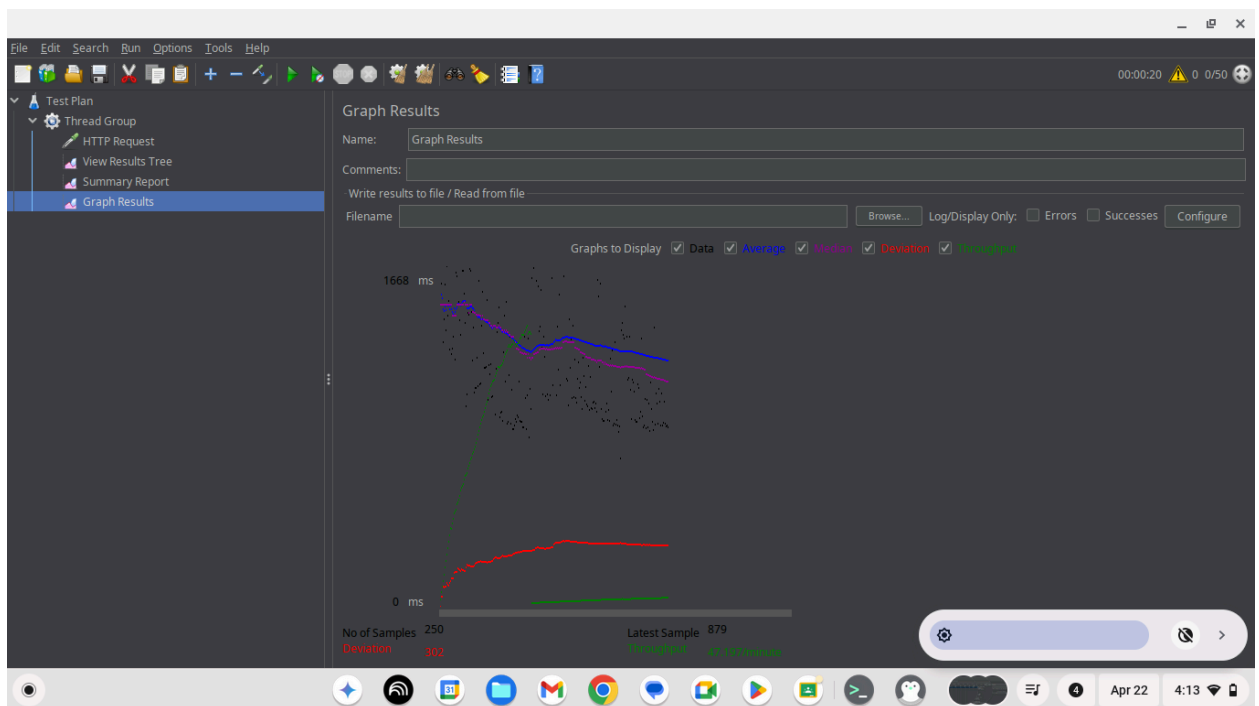

From JMeter Summary Report:

- Total Samples: **550**
- Average Response Time: **600.76 ms**
- Minimum Error Rate: **36.36%**
- Throughput: **0.68 requests/sec**
- Received KB/sec: **13.52**
- Sent KB/sec: **0.10**

5. Observations

- The system shows a high error rate (36.36%), indicating many failed requests under load.
- Average response time is around **600 ms**, which is acceptable for light load.
- Throughput is relatively low, indicating limited request handling capacity.
- Some instability observed when multiple users access login and dashboard simultaneously.

6. Graphical Analysis

Text

Sampler result: Request Response data

Thread Name: Thread Group 1-41

Sample Start: 2026-04-22 03:49:00 PKT

Load time: 1006

Connect Time: 12

Latency: 164

Size in bytes: 31411

Sent bytes: 246

Headers size in bytes: 2040

Body size in bytes: 29371

Sample Count: 1

Error Count: 0

Data type ("text" | "bin" | ""): text

Response code: 200

Response message: OK

HTTPSampleResult fields:

ContentType: text/html; charset=utf-8

DataEncoding: utf-8

7. Success Criteria Comparison

- Expected Error Rate: < 5%
- Actual Error Rate: 36.36%
- Expected Response Time: < 3 seconds
- System Stability: Not achieved under load
-

8. Conclusion

The website **ticketwala.pk** does not perform efficiently under load conditions. While response time is acceptable, the high error rate and low throughput indicate performance bottlenecks.

9. Recommendations

- Optimize backend API handling
- Improve database query performance
- Add load balancing for high traffic
- Implement caching mechanisms
- Improve session management for login system
