

Week 5 : Security Testing Report

Project Title: Complaint Management System

Tested By: Uzair Shamsi

Tools Used:

- OWASP ZAP
- Web Browser (Chrome)

Objective:

To identify security vulnerabilities in the web application including input validation flaws, XSS attacks, session management issues, and authentication weaknesses.

Scope:

- Login & Logout System
- Complaint Submission Form
- User Dashboard
- Session Handling

Testing Techniques:

- Passive Scanning
- Manual Testing
- Intercepting Proxy Analysis

Summary of Findings:

Severiy	Count
High	1
Medium	2
Low	2
